Made with our exclusive PureColor® fiber, all of our carpets are engineered to be beautiful AND durable. Whether it’s our PureColor® Nylon or our PureColor® Polyester, all of our carpets have additional soil and stain protection which makes them easier to clean.

Installed correctly and following proper care and maintenance, your Dream Weaver®, Dwellings®, Engineered Floors® Multifamily, or Pentz® branded carpet, made with our exclusive PureColor® fiber, will stay looking newer and more beautiful longer. PureColor® is our proprietary brand of solution-dyed fiber that is used in every carpet we make. All of our carpets are warranted against staining, fading, soiling, abrasion, manufacturer defects and loss of texture retention. The majority are also warranted against pet stains. Visit engineeredfloors.com for warranty specifications.
FEATUERES & BENEFITS

• PureColor® fiber is solution-dyed so the color is permanent. It will not fade, wear off, or bleach from cleaning.

• PureColor® fiber resists stains from ketchup, red wine, coffee, and chocolate.

• PureColor® fiber uses 30% less energy, 87% less water, and emits 42% less greenhouse gases during production.

• PureColor® fiber carries Lifetime Limited Warranties against household stains, fading, AND the majority are warranted against pet stains.

• PureColor® fiber carries up to 25 year Limited Soil Resistance, Abrasive Wear, Texture Retention, and Manufacturing Defect Warranties.

• The PureColor® fiber soil and stain shield protects the fiber, making it easier to vacuum soil and remove dirt.
Our PureColor® Nylon and Polyester Collections offer a sophisticated balance of tweeds and tonals comprising vibrant accents, contemporary patterns, and timeless loops. Each of these elegant styles is exceptionally beautiful, with natural colorations throughout each pallet. Additionally, the PureColor® Nylon and Polyester collections offer extraordinary durability and advanced soil and stain resistance that can withstand the everyday mishaps of an active family, including your pet.

With our N2 Nylon carpet fiber, we have virtually eliminated the dye sites through cationic technology. With fewer dye sites, our nylon fiber will not attract or absorb most household stains like conventional nylon fiber and our stain resistance is permanent – no matter how many times you clean it.
Household cleaners with bleach can discolor any traditional piece-dyed nylon product, while our PureColor® Nylon Fiber System can withstand those same cleaners with NO discoloration.

THE PURECOLOR® BLEACH TEST

Competitive Piece-Dyed Nylon

Solution-Dyed Nylon
Engineered Floors LLC® is one of the largest and fastest-growing carpet mills in the world. We began production in 2009 with the most modern, eco-friendly equipment, facilities, and processes, as well as some of the most talented people in the industry. We serve the needs of the floorcovering specialty retailer with our Dream Weaver® brand; the new home builder with our Dwellings® brand; property owners and managers of multifamily housing with our Engineered Floors® Multifamily brand; and the commercial market with our Pentz® brand.

OWN WITH PRIDE

- All of our manufacturing facilities are located in the United States.

- We eliminate the inefficient and costly need to transport carpet between multiple production facilities.

- We minimize the use of natural resources to reduce our impact on the environment.
